Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mikito et al JP11246541, (1999), English abstract (best available) in view of Hiwara et al US 6166100.

Mikito et al teach oxetane carbamates substituted with a bifunctional aliphatic residue (read acryloyl). See the abstract. While Mikito et al does not specifically teach a acryloyl substituent linked to carbamate Hiwara et al does teach analogous oxetanes having this group in order to obtain good dispersibility and flow properties. See, for example, column 1 lines 34-44, column 2 lines 1+ particularly lines 45-50. To modify Mikito et al to obtain these properties in light of these teachings would have been obvious to one of ordinary skill in the art and therefore unpatentable.

Claims 5 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mikito et al JP11246541, (1999), English abstract (best available).

Mikito et al teach of reacting an oxetane with an isocyanate using a tertiary amine catalyst in a process analogous to that recited in the claims. See the abstract. To use somewhat different but otherwise analogous starting materials in an otherwise known process would have been obvious to one of ordinary skill in the art as the results, substituted oxetane carbamates, would not have been unexpected.

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raymond Covington whose telephone number is (571) 272-0681. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas McKenzie at telephone number (571) 272-0681.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR
